

Reading Material Questions

Please read the article “*What is Dark Matter?*” by Lisa Randall and start to think about the following questions:

- 1) What are the main indicators that Dark Matter exists?
- 2) What clues do these observations give us as to the nature and properties of Dark Matter?
- 3) Why do we not think that Dark Matter is made of known particles from the Standard Model?
- 4) What evidence might we need to see to say that we have “discovered” Dark Matter?
