Lucy Cavendish College is a trailblazer in Cambridge University. From the beginning, we have opened the Cambridge door to exceptional students from under-represented and historically excluded backgrounds. And not only admitted these students but made sure that they thrive at Cambridge, fulfilling their academic potential and developing their personal and professional skills. Always outward-facing, Lucy Cavendish looks for students who have an enterprising mindset and who are determined to make a positive contribution to society. We take risks on unconventional applicants who, because of their background and not in spite of it, have the experiences to challenge taken-for-granted assumptions, to contribute new ways of thinking to complex problems, and to ensure that innovative solutions are likely to succeed. And our senior researchers are selected because they are working in an interdisciplinary way on aspects of the ‘grand challenges’ confronting humankind and our planet.

We are the most diverse College in Cambridge. Our aim is to be broadly representative of UK society and to increase the proportion of our international students who come from low-income backgrounds. We are well on our way to achieving these ambitions. Our UK undergraduate intake is now typically 90+% from state schools and 30+% from areas that rank in the lowest two categories of the government index of multiple deprivation. 40+% of our UK students self-identify as non-white and more than half of those who do identify as white come from unskilled or semi-skilled families. Overall, one in four is the first in family to go to university. The grades with which they enter always meet or exceed those required by the University.

Meanwhile, our international students come from 80+ countries and, through successful fundraising, we are gradually increasing the number from less developed countries or from low-income/under-represented backgrounds in more developed countries. The majority of our graduate students are studying for a Masters degree and while some go on to exciting PhDs and wonderful academic careers, the majority graduate into employment. Over the last ten years, 50% of our alumni have gained leadership positions in organisations of all kinds that are addressing the UN Sustainable Development Goals.

So if this kind of environment speaks to your values, and if our mission excites you, please read on! Our students are amazing and our staff are committed and very loyal. Together we seek to build a friendly culture which is supportive of all, develops talent, and brings out the best in each of us.
